
KILLER INFLUENCE – MIDJOURNEY V7 PROMPT PACK
"Elevated survival-horror for the algorithm age"

PROJECT DNA:

- SAW-style engineered kills + SQUID GAME elimination structure
- One modular soundstage that reconfigures into traps and sets
- Dual visual language: 9:16 content frames vs. widescreen surveillance dread
- Meta-viral engine: survival tied to views, shares, and closed engagement

LIGHTING MOOD REFERENCE:

Neon Noir	Red/blue mixed light, smoky air, high contrast
Clinical Decay	Sickly greens, fluorescent buzz, sterile grime
Industrial Heat	Tungsten orange, steam, metal sheen
Surveillance Cold	White overhead rig light, hard shadow edges

SCENE 01: THE RED CORRIDOR (Entrance / Execution Zone)

NARRATIVE CONTEXT: DAY 1 – "The Accident"

The studio doors seal. Nine influencers realize the game is real when the first "accident" occurs. This is their entry point—the threshold between invitation and imprisonment.

STORY BEAT: Initial entrapment, realization of stakes, The Voice's first decree

CHARACTER PRESENCE: All 9 creators enter as silhouettes, identities obscured

PROMPT:

cinematic wide shot inside red-lit corridor labeled "S1," two hooded

silhouettes framed by glowing crimson light, fog swirling around their feet,
glossy black floor reflections, flickering overhead fluorescents, deep shadows
hide faces, 35 mm lens, handheld ARRI Alexa Mini LF, aperture f/2.8
shallow
DOF, moody neon noir lighting, algorithmic horror aesthetic, film
grain 8K
realism --ar 21:9 --style cinematic --seed 1123

TECHNICAL SPECS:

- Camera: ARRI Alexa Mini LF
- Lens: 35mm prime
- Aperture: f/2.8 (shallow depth of field)
- Movement: Handheld
- Aspect Ratio: 21:9 (ultra-widescreen)
- Lighting: Neon Noir (red/blue mixed, high contrast)
- Mood: Algorithmic horror, entrance dread
- Seed: 1123

ALTERNATE RATIOS:

16:9 (standard widescreen) → --ar 16:9
9:16 (vertical content frame) → --ar 9:16

SCENE 02: THE ASYLUM WING (Medical Set)

NARRATIVE CONTEXT: DAY 2 – "Editing Tragedy"

The soundstage reconfigures into a decaying hospital. Prompt: film a medical emergency scene. Virality demands they cut real tragedy *into* the edit to survive. LEXI's SFX skills become weaponized.

STORY BEAT: First mandatory "scene" production, practical effects turn lethal

CHARACTER PRESENCE: LEXI (SFX Artist), BRAD (Stuntman), SYLVIA (Writer)

PROMPT:

decaying hospital corridor from the late 20th century, sickly green and beige
palette, cracked tiles, IV stands casting long silhouettes, flickering fluorescent lights, reflective linoleum, faint blood smears near drainage grate, shallow depth of field, Sony FX6 cinema camera, 35 mm prime

lens,
cinema handheld shot, sterile but grimy mood --ar 16:9 --seed 2391
--style photoreal --no faces

TECHNICAL SPECS:

- Camera: Sony FX6
- Lens: 35mm prime
- Aperture: f/2 (shallow DOF for unease)
- Movement: Cinema handheld (documentary realism)
- Aspect Ratio: 16:9 (standard broadcast)
- Lighting: Clinical Decay (sickly greens, fluorescent buzz)
- Mood: Institutional horror, medical dread
- Seed: 2391

THEMATIC NOTE:

The medical set represents the first "prompt" where film gear becomes lethal.

IV stands = spears. Surgical tools = weapons. The set itself is a trap.

SCENE 03: THE DETENTION BLOCK (School Hallway)

NARRATIVE CONTEXT: DAY 3 – "Metrics & Morality"

School hallway configuration. The prompt targets nostalgia and innocence.

Metrics = morality. Refusal to participate triggers punishment. Trust between creators collapses. REBECCA (AD) tries to maintain order; the rulebook burns.

STORY BEAT: Forced participation, moral decay, alliance fractures

CHARACTER PRESENCE: REBECCA (AD), KAM (Director), TRISH & JOSH (The Couple)

PROMPT:

abandoned 1990s school hallway, lockers with faded graffiti, one silhouette
slamming door, flickering light creates motion blur, dust in air, handheld
look with film grain, Canon C300 Mark III 50 mm lens, aperture f/2, nostalgic
but menacing tone, neon yellow and muted green light palette --ar 16:9
--style analog film --seed 4409 --no faces

TECHNICAL SPECS:

- Camera: Canon C300 Mark III
- Lens: 50mm prime
- Aperture: f/2 (isolates subject in chaos)
- Movement: Handheld (chaos, instability)
- Aspect Ratio: 16:9
- Lighting: Institutional yellow/green (nostalgic menace)
- Mood: Violated innocence, institutional control
- Seed: 4409

VISUAL STYLE NOTE:

Analog film grain evokes found-footage authenticity. The 90s nostalgia is weaponized-childhood spaces turned into death traps. Perfect for the "metrics = morality" thematic turn.

SCENE 04: THE GUTS (Boiler Room)

NARRATIVE CONTEXT: DAY 4 – "Betrayal Mechanics"

The set literally reconfigures against them. Pipes burst. Steam scalds.

Valves become puzzles. The soundstage's infrastructure is exposed—both literally and metaphorically. Alliances tested; gear becomes murder weapons.

STORY BEAT: Environmental betrayal, SAW-style trap activation, physical stakes

CHARACTER PRESENCE: BRAD (Stuntman) meets his end, WILLY (DP), MARK (Sound)

PROMPT:

industrial boiler room labyrinth of pipes and valves, red warning lights
cutting through dense steam, faceless silhouettes outlined by glow, wet metal
and condensation dripping, tungsten backlight with smoke depth, Blackmagic
URSA Mini Pro G2, 24 mm lens low angle, cinematic texture 8K clarity
--ar 21:9 --seed 6182 --style cinematic horror --no faces

TECHNICAL SPECS:

- Camera: Blackmagic URSA Mini Pro G2
- Lens: 24mm wide angle
- Aperture: Low (deep focus on labyrinthine space)
- Movement: Low angle (oppressive, trapped POV)
- Aspect Ratio: 21:9 (ultra-wide for spatial dread)

- Lighting: Industrial Heat (tungsten orange, steam, metal sheen)
- Mood: SAW-style mechanical horror, claustrophobic
- Seed: 6182

THEMATIC NOTE:

"The Guts" = the exposed machinery of the game. This is where BRAD's stunt skills fail him—safety rigs can't save you when the environment is sentient.

SCENE 05: THE PANOPTICON (TV Studio / Control Room)

NARRATIVE CONTEXT: ONGOING META-LAYER — "The Voice's Domain"

The dual-reality nerve center. Half raw backstage infrastructure, half glittering broadcast studio. THE VOICE's announcements echo here. Red tally lights = death sentences. This is where performance meets punishment.

STORY BEAT: Meta-commentary space, audience complicity reveal, surveillance HQ

CHARACTER PRESENCE: THE VOICE (unseen showrunner), KAM (Director in his element)

PROMPT:

dual reality environment, half raw concrete backstage corridor, half glittering LED TV studio, faceless host silhouette center frame under glitching spotlight, red and blue light split the scene, confetti drifting in
slow motion, overhead rigging visible, ARRI Alexa LF 65 mm lens, steady-cam
tracking, high-contrast lighting mix --ar 21:9 --seed 9147
--style surreal broadcast --no faces

TECHNICAL SPECS:

- Camera: ARRI Alexa LF
- Lens: 65mm (portrait compression, subject isolation)
- Aperture: Medium (split focus on dual reality)
- Movement: Steady-cam tracking (omniscient, controlled)
- Aspect Ratio: 21:9
- Lighting: Split Red/Blue (duality, broadcast vs. reality)
- Mood: THE TRUMAN SHOW horror, meta-surveillance
- Seed: 9147

VISUAL STYLE NOTE:

This is the MOST IMPORTANT thematic space. Confetti = celebration of

death.

LED studio = the algorithm made physical. Concrete backstage = the brutal reality beneath the performance. Perfect for revealing audience complicity.

SCENE 06: THE OPEN ROOM (Central Arena)

NARRATIVE CONTEXT: THE REVELATION – "All Sets Were One"

Overhead reveal: the entire soundstage exposed. All the "sets" (S1–S9) are visible as modular zones within one massive arena. The survivors stand in the center, realizing they've been rats in a maze the whole time.

STORY BEAT: Spatial revelation, god's-eye-view of the game, pre-finale position

CHARACTER PRESENCE: Remaining survivors (LEXI as likely Final Girl)

PROMPT:

overhead drone shot of massive soundstage arena, walls labeled S1–S9, red tally lights glowing on rigging, seven silhouetted figures standing in a circle on polished concrete, fog layers and diffused white light from above,
Epic 8K aerial composition with high contrast, digital grain realism
--ar 16:9 --seed 7724 --style cinematic surveillance --no faces

TECHNICAL SPECS:

- Camera: Drone / Wire-cam rig
- Lens: Wide aerial (god's-eye perspective)
- Aperture: Deep focus (entire space in frame)
- Movement: Overhead tracking (omniscient surveillance)
- Aspect Ratio: 16:9 (cinematic reveal)
- Lighting: Surveillance Cold (white overhead, hard shadows)
- Mood: ESCAPE ROOM spatial horror, reveal of scale
- Seed: 7724

THEMATIC NOTE:

The ultimate SQUID GAME reference. This is the "arena" reveal—all the modular horror spaces exist simultaneously. The audience has been watching from above the entire time. Perfect for act three positioning.

SCENE 07: THE OPEN SPACE (Exit Illusion / End Scene)

NARRATIVE CONTEXT: FINALE – "The Live Studio Audience"

The tunnel to freedom. Red emergency lights fade to white. But the white light isn't escape—it's stage lights. LEXI (Final Girl) walks toward what she thinks is freedom, only to emerge into a LIVE STUDIO AUDIENCE. The twist: she was content all along.

STORY BEAT: False exit, THE BELKO EXPERIMENT ending, audience reveal

CHARACTER PRESENCE: LEXI (Final Girl), THE VOICE (revealed as showrunner)

PROMPT:

dark tunnel leading from soundstage, red emergency lights fade into white doorway in distance, silhouettes walking toward light, fog dense near floor, cables overhead form abstract geometry, Sony Venice 50 mm lens, f/1.8 depth, cinematic long exposure glow, psychological thriller tone --ar 21:9 --seed 9091 --style dreamlike exit --no faces

TECHNICAL SPECS:

- Camera: Sony Venice
- Lens: 50mm prime
- Aperture: f/1.8 (shallow focus on white doorway)
- Movement: Slow tracking toward light (false hope)
- Aspect Ratio: 21:9 (ultra-wide for tunnel perspective)
- Lighting: Red-to-White gradient (false salvation)
- Mood: Psychological horror, dreamlike dread
- Seed: 9091

THEMATIC NOTE:

The white light = the audience. The ultimate horror: LEXI isn't escaping, she's *debuting*. This is where the film reveals its meta-commentary—the viewers were complicit spectators all along. Survival = ratings.

SUPPLEMENTAL: ASPECT RATIO GUIDE FOR DUAL VISUAL LANGUAGE

Per pitch deck: "Dual language: 9:16 'content frames' vs. widescreen dread"

9:16 VERTICAL (CONTENT FRAME):

Use for: Social media POVs, character reaction shots, "viral content" being filmed within the story. Add UI overlays in post (likes, comments, chat).

Example: --ar 9:16 --style vertical content

16:9 STANDARD WIDESCREEN:

Use for: Traditional cinematic moments, reveals, ensemble shots.

Example: --ar 16:9 --style cinematic

21:9 ULTRA-WIDESCREEN:

Use for: Scope/epic dread, spatial horror, surveillance god's-eye shots.

Example: --ar 21:9 --style cinematic horror

RECOMMENDED WORKFLOW: MIDJOURNEY V7 → VE03 PIPELINE

1. Generate stills in Midjourney V7 using these prompts
2. Select hero frames for each scene
3. Import to Veo3 for:
 - Camera movement (tracking, handheld shake, dolly)
 - Atmospheric FX (fog, steam, particle drift)
 - Lighting flicker/glitch effects
4. Export as 4K or 8K clips
5. Edit in DaVinci Resolve or Premiere with:
 - UI overlays for 9:16 "content" shots
 - Sound design (PA announcements, tally light beeps, THE VOICE)
 - Color grade per lighting mood codes

CHARACTER-SPECIFIC VARIANT PROMPTS (OPTIONAL ADD-ONS)

LEXI (Final Girl – SFX Artist):

Add to any prompt: "goth-glam silhouette with practical effects tools, resourceful body language"

KAM (Director):

Add to any prompt: "commanding silhouette with director's viewfinder, framing gesture"

TRISH & JOSH (The Couple):

Add to any prompt: "two silhouettes in conflict posture, relationship breakdown body language"

SYLVIA (Writer):

Add to any prompt: "isolated silhouette with script pages, intellectual vulnerability"

THE VOICE:

Visual representation: "glowing red speaker grilles, surveillance camera eyes, broadcast tower silhouette"

COLOR PALETTE REFERENCE (FOR CONSISTENCY)

PRIMARY: #ef4444 (Red Tally Light)

SECONDARY: #1e3a8a (Surveillance Blue)

ACCENT: #84cc16 (Sickly Institutional Green)

NEUTRAL: #1f2937 (Soundstage Black)

HIGHLIGHT: #f97316 (Industrial Tungsten Orange)

END OF PROMPT PACK

For questions or customization: Match prompts to specific story beats from

the 5-day structure (Day 1-4 + Finale) as outlined in pitch deck.
