
KILLER INFLUENCE – PROMPT PACK README

Complete Midjourney V7 / Veo3 Workflow Package

PACKAGE CONTENTS

This prompt pack contains 4 comprehensive files designed to align your Midjourney V7 scene prompts with the KILLER INFLUENCE pitch deck narrative:

1.  Killer_Influence_MJ_Prompt_Pack.txt
→ Full narrative context, technical specs, and detailed prompts
2.  Killer_Influence_MJ_Prompt_Pack.json
→ Structured data format for programmatic use/automation
3.  Killer_Influence_Quick_Reference.txt
→ Condensed cheat sheet for rapid on-set/production reference
4.  Killer_Influence_Shot_List.txt
→ Traditional production format with shot-by-shot breakdowns

QUICK START: HOW TO USE THIS PACK

STEP 1: UNDERSTAND THE SCENE-TO-STORY MAPPING

Each of your 7 scenes (S1-S7) now maps to specific narrative beats from the pitch deck's 5-day structure:

- | | |
|----------------------|--|
| S1 (Red Corridor) | → DAY 1: The Accident (Initial trap) |
| S2 (Asylum Wing) | → DAY 2: Editing Tragedy (First forced production) |
| S3 (Detention Block) | → DAY 3: Metrics & Morality (Trust collapse) |
| S4 (The Guts) | → DAY 4: Betrayal Mechanics (Environment hostile) |
| S5 (The Panopticon) | → META-LAYER: The Voice's Domain (Ongoing) |
| S6 (The Open Room) | → REVELATION: All sets exposed as one arena |
| S7 (The Open Space) | → FINALE: False exit, live audience twist |

STEP 2: CHOOSE YOUR FILE BASED ON USE CASE

USE THE .TXT PACK IF:

- You want full narrative context and thematic notes
- You're building a pitch presentation
- You need detailed explanations of each scene's story purpose

USE THE .JSON FILE IF:

- You're building automated workflows
- You need programmatic access to prompt data
- You're integrating with ComfyUI or other automation tools

USE THE QUICK REFERENCE IF:

- You're actively generating in Midjourney NOW
- You need fast prompt copy/paste
- You're on-set or in production mode

USE THE SHOT LIST IF:

- You're presenting to traditional film crew
 - You need production-standard documentation
 - You're planning actual shoots or storyboarding
-
-

MIDJOURNEY V7 WORKFLOW

BASIC WORKFLOW (Copy/Paste Method):

1. Open Quick Reference file
2. Copy prompt for desired scene (e.g., S1)
3. Paste directly into Midjourney V7
4. Generate
5. Select best outputs
6. Upscale to 8K

ADVANCED WORKFLOW (Batch Generation):

1. Use the JSON file with MJ automation tools
2. Generate all 7 scenes with consistent seeds
3. Create variant versions (9:16, 16:9, 21:9)
4. Build shot library organized by story beat

PRO TIP: ASPECT RATIO VARIATIONS

Per your pitch deck's "dual visual language" concept, generate each scene

in BOTH formats:

WIDESCREEN VERSION (for cinematic dread):

→ Use original --ar 21:9 or --ar 16:9 settings

VERTICAL VERSION (for "content frame" POV):

→ Replace aspect ratio with --ar 9:16

→ These will simulate the "viral content" being filmed within the story

→ Add UI overlays in post (likes, comments, engagement metrics)

VE03 WORKFLOW (Motion Pipeline)

Once you have your MJ still frames:

STEP 1: SELECT HERO FRAMES

Choose the best 1-2 outputs per scene that match your vision

STEP 2: IMPORT TO VE03

Use Veo3's motion controls to add:

For S1 (Red Corridor):

- Handheld camera shake (2-3Hz)
- Fog drift left-to-right
- Light flicker at 0.5s intervals

For S2 (Asylum Wing):

- Slow forward dolly (0.3 m/s)
- Irregular light flicker (broken ballast effect)
- Lens breathing on focus shift

For S3 (Detention Block):

- Medium handheld shake (5Hz)
- Locker door slam action at 2s mark
- Analog film grain overlay

For S4 (The Guts):

- Heavy steam drift
- Red warning light pulses (1.5s intervals)
- Slow forward creep (0.2 m/s)

For S5 (The Panopticon):

- Smooth steady-cam tracking (NO shake)

- Confetti slow-motion (40% speed)
- Spotlight glitch (3 flashes)

For S6 (The Open Room):

- Slow descending camera (god's-eye)
- Red tally lights pulse in sequence
- Subtle rotation (10° over 5s)

For S7 (The Open Space):

- SLOWEST movement (0.1 m/s)
- White light intensity ramp (5s)
- Fog undulation with character movement

STEP 3: EXPORT

-
- Export as 4K or 8K clips
 - Maintain consistent color space (Rec.709 or DCI-P3)
-
-

🎨 POST-PRODUCTION GUIDE

EDITING SOFTWARE: DaVinci Resolve or Premiere Pro

COLOR GRADING (Use Lighting Mood Codes):

S1 & S5	Neon Noir (Red #ef4444 / Blue #1e3a8a)
S2	Clinical Decay (Green #84cc16)
S3	Institutional Yellow/Green
S4	Industrial Heat (Orange #f97316)
S6 & S7	Surveillance Cold (White #f3f4f6)

UI OVERLAYS (for 9:16 vertical versions):

- Add social media interface elements
- Top third: Leave clear for metrics (likes, shares, views)
- Bottom: Comment/chat simulation
- Corner: "REC" indicator with pulse animation

SOUND DESIGN:

- PA announcements (THE VOICE's decrees)
- Tally light beep sound (red light activation)
- Surveillance camera movement sounds
- Ambient soundstage acoustics
- Digital glitch/UI sounds for S5

FINAL ASSEMBLY:

- Cut between widescreen (cinematic horror) and vertical (content POV)
 - Use vertical cuts to show "what's being filmed for virality"
 - Use widescreen for "brutal reality" moments
-
-

CHARACTER-SPECIFIC VARIANTS (OPTIONAL)

If you want to generate character-focused shots, ADD these descriptors:

LEXI (Final Girl – SFX Artist):

+ "goth-glam silhouette with practical effects tools, resourceful body language"

→ Use in S2, S6, S7

KAM (Director):

+ "commanding silhouette with director's viewfinder, framing gesture"

→ Use in S3, S5

TRISH & JOSH (The Couple):

+ "two silhouettes in conflict posture, relationship breakdown body language"

→ Use in S3

SYLVIA (Writer):

+ "isolated silhouette with script pages, intellectual vulnerability"

→ Use in S2

THE VOICE (Visual Representation):

+ "glowing red speaker grilles, surveillance camera eyes, broadcast tower silhouette"

→ Use in S5, S7

TECHNICAL SPECIFICATIONS SUMMARY

CAMERA PACKAGE:

- S1: ARRI Alexa Mini LF (35mm f/2.8)
- S2: Sony FX6 (35mm f/2)
- S3: Canon C300 Mark III (50mm f/2)
- S4: Blackmagic URSA Mini Pro G2 (24mm wide)
- S5: ARRI Alexa LF (65mm portrait)
- S6: Drone / Wire-cam (14mm equivalent)
- S7: Sony Venice (50mm f/1.8)

ASPECT RATIOS:

- └ 21:9 → Ultra-widescreen (S1, S4, S5, S7)
- └ 16:9 → Standard widescreen (S2, S3, S6)
- └ 9:16 → Vertical content frame (ALL scenes as variants)

SEEDS (for consistency):

- └ S1: 1123
- └ S2: 2391
- └ S3: 4409
- └ S4: 6182
- └ S5: 9147
- └ S6: 7724
- └ S7: 9091

💡 PRO TIPS & BEST PRACTICES

1. MAINTAIN SEED CONSISTENCY

- Use the same seed for shot matching across scenes
- Vary only the prompt text for different angles

2. BATCH GENERATE

- Do all 7 scenes in one session for consistent style
- Generate 4–6 variations per scene for options

3. ASPECT RATIO STRATEGY

- Primary: Generate widescreen versions first
- Secondary: Create 9:16 versions for meta-commentary
- Use vertical versions to show "content being filmed within the story"

4. LIGHTING REFERENCE

- Save color-corrected frames as LUTs
- Apply consistent grading across matched scenes

5. STORY BEAT ALIGNMENT

- When presenting, show scenes in DAY order (1–4, then 5, 6, 7)
- This matches your pitch deck structure

🎯 PITCH DECK INTEGRATION

HOW TO USE THESE VISUALS IN YOUR PITCH:

HERO SECTION:

- Use S1 or S6 as main key art
- Replace placeholder images in pitch deck

WORLD & TONE SECTION:

- Insert S5 (Panopticon) to show dual reality concept
- Use S4 (The Guts) for modular set demonstration

STRUCTURE SECTION (Day-by-Day):

- DAY 1 accordion: Insert S1 image
- DAY 2 accordion: Insert S2 image
- DAY 3 accordion: Insert S3 image
- DAY 4 accordion: Insert S4 image
- FINAL DAY accordion: Insert S7 image

VISUAL STYLE SECTION:

- Show side-by-side: 9:16 vertical vs. 21:9 widescreen versions
- Demonstrates "dual visual language" from pitch

THE FINALE SECTION:

- Use S7 (white light doorway) as twist reveal visual

DNA ALIGNMENT CHECK

Your scenes now perfectly match the pitch deck DNA:

- ✓ SAW-LIKE ENGINEERED KILLS
 - S4 (The Guts) shows mechanical trap environment
 - S2 (Asylum Wing) shows medical gear as weapons
- ✓ SQUID GAME ELIMINATION STRUCTURE
 - S6 (The Open Room) shows arena reveal
 - S1-S7 progression mirrors 5-day escalation
- ✓ ONE-LOCATION MODULAR SOUNDSTAGE
 - All 7 scenes exist within same physical space
 - S6 overhead shot proves this visually
- ✓ META-VIRAL ENGINE
 - S5 (Panopticon) embodies the algorithm
 - 9:16 vertical versions show "content being filmed"
- ✓ DUAL VISUAL LANGUAGE
 - Widescreen = cinematic dread (reality)

→ Vertical 9:16 = content frames (performance)

NEXT STEPS

IMMEDIATE ACTIONS:

1. ☐ Generate S1-S7 in Midjourney V7 (widescreen versions)
2. ☐ Select 1-2 hero frames per scene
3. ☐ Generate 9:16 vertical variants for meta-commentary
4. ☐ Import best frames to Veo3 for motion

SHORT-TERM:

5. ☐ Add motion per Veo3 workflow notes
6. ☐ Export clips as 4K/8K sequences
7. ☐ Color grade per lighting mood codes
8. ☐ Add UI overlays to vertical versions

PITCH DECK INTEGRATION:

9. ☐ Replace pitch deck placeholder images
10. ☐ Create side-by-side dual language example
11. ☐ Build sizzle reel from motion clips

LONG-TERM:

12. ☐ Expand to full shot list for production
 13. ☐ Create animatics using Veo3 clips
 14. ☐ Build lookbook for cinematographer reference
-
-

TROUBLESHOOTING

PROBLEM: MJ not generating desired composition

SOLUTION: Add more specific framing terms ("center frame," "left third," etc.)

PROBLEM: Aspect ratio looks off

SOLUTION: Double-check --ar parameter; 21:9 and 9:16 often confused

PROBLEM: Lighting doesn't match mood

SOLUTION: Reference color codes in palette section; adjust prompts

PROBLEM: Veo3 motion looks unnatural

SOLUTION: Reduce speed values; horror benefits from slow camera movement

PROBLEM: Scenes don't feel connected

SOLUTION: Use consistent seeds; batch generate for style unity

ADDITIONAL RESOURCES

PITCH DECK REFERENCE:

- Review 5-day structure for story beat alignment
- Character bios inform silhouette body language
- DNA section justifies visual choices

LIGHTING MOODS:

- Use color palette codes for grading reference
- Each mood ties to specific story themes

TECHNICAL SPECS:

- Camera choices reflect scene intensity
 - Lens selection creates depth and isolation
-
-

FINAL NOTE

This prompt pack transforms your raw Midjourney scene descriptions into a complete narrative-driven visual toolkit aligned with KILLER INFLUENCE's core themes:

- Influencer culture critique
- Audience complicity
- Algorithm as killer
- Performance as survival

Every technical choice (camera, lens, lighting, aspect ratio) reinforces the story's meta-commentary on content creation, virality, and the horror of being watched.

Good luck with your production!
